# V460 scarifier

## Compact scarifier.

The Jo Beau V460 ensures even scarifying due to the knife axis being in line with the wheel axis, so the machine keeps a uniform depth of cut regardless of terrain. Because the rotor turns in the direction of travel, it allows the machine to pull itself forward. The castor wheels at the rear of the machine allow the V460 to remain balanced, and also allow easy turning at the end of the swath. Reliable, very solid, professional construction; ideal for the everyday user, landscapers, rental companies...

## Safety.

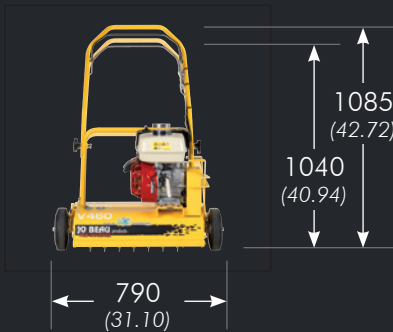

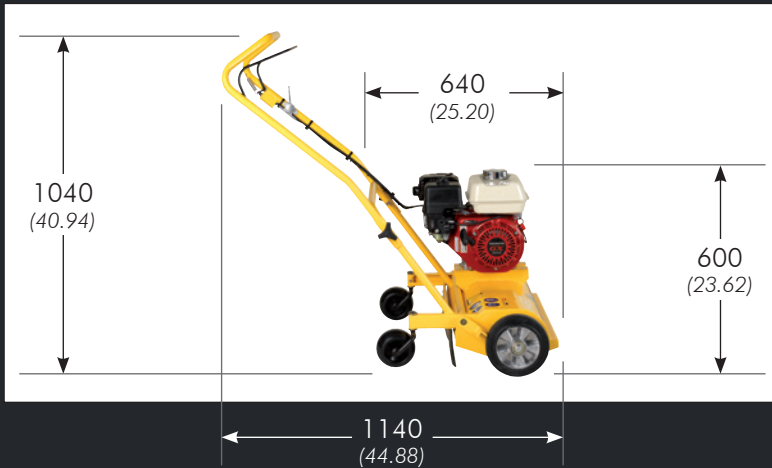

All machines are manufactured in accordance with European Regulations and comply with CE. Each machine is supplied with an operator's manual and parts book.
